

OpportunityPedia — Quick Start Guide

A short tour of the product: what it is, why it helps, and how to use it after you sign in.

What is OpportunityPedia?

OpportunityPedia (by **OpportunityX**) helps staffing and business development teams find hiring signals and government opportunities **in one place** — then prioritize and act together.

The problem

Today, teams often:

- Check many sites by hand
- Share leads in chats or spreadsheets
- Miss follow-ups

OpportunityPedia turns that into one clear workspace.

What you get

1. **Scan** with Radar (one click)

2. **See** commercial and government opportunities together
3. **Focus** on what's **Hot** / **Very Hot**
4. **Assign**, outreach, and track as a team
5. **Unlock** handpicked Vendor leads after a successful scan

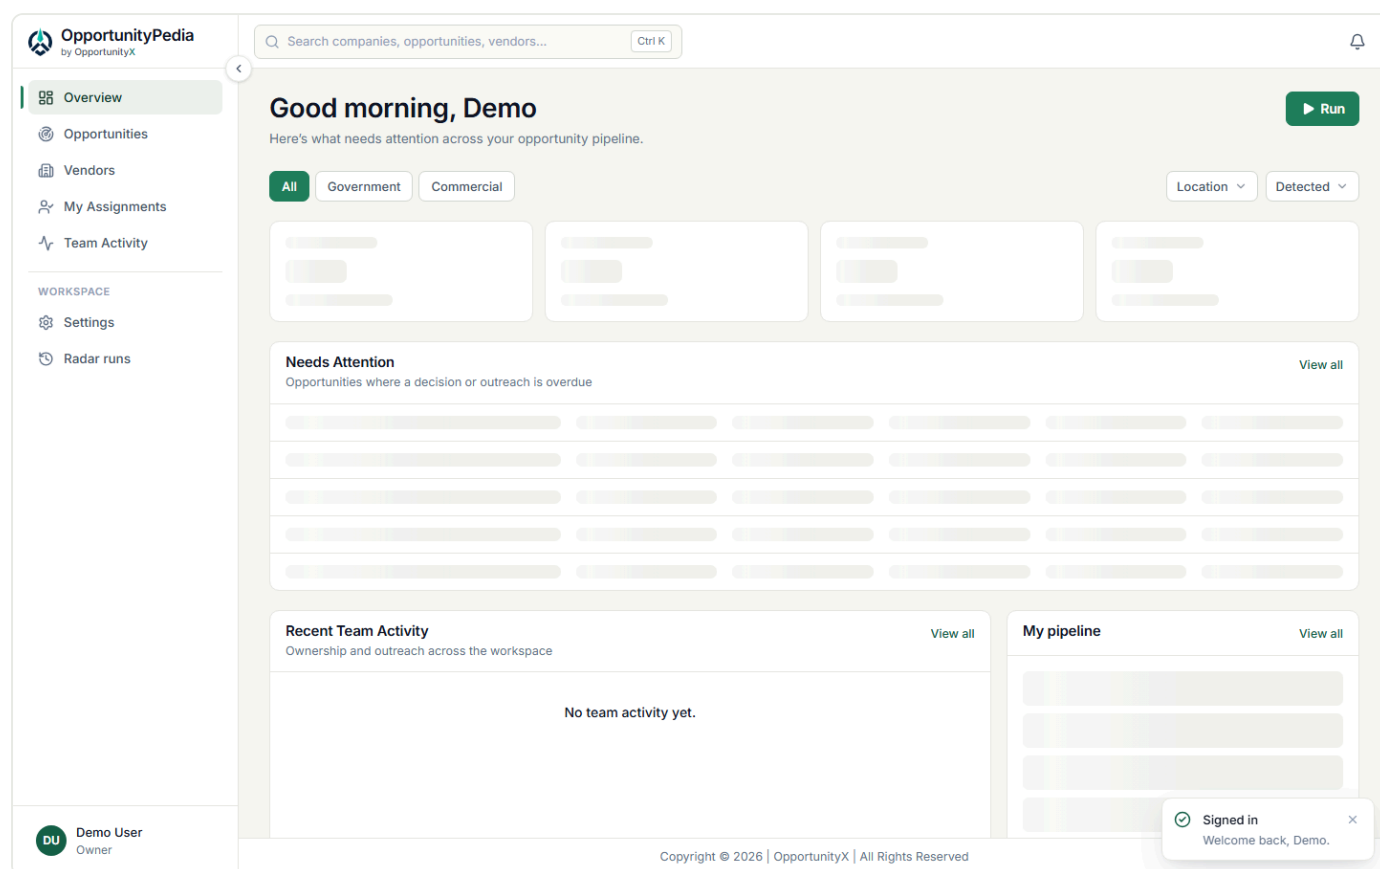

Your first session

1. Sign in

Open the login page with your account. You land on **Overview**.

2. Run Radar

On **Overview**, click **Run**. Wait until the scan finishes.

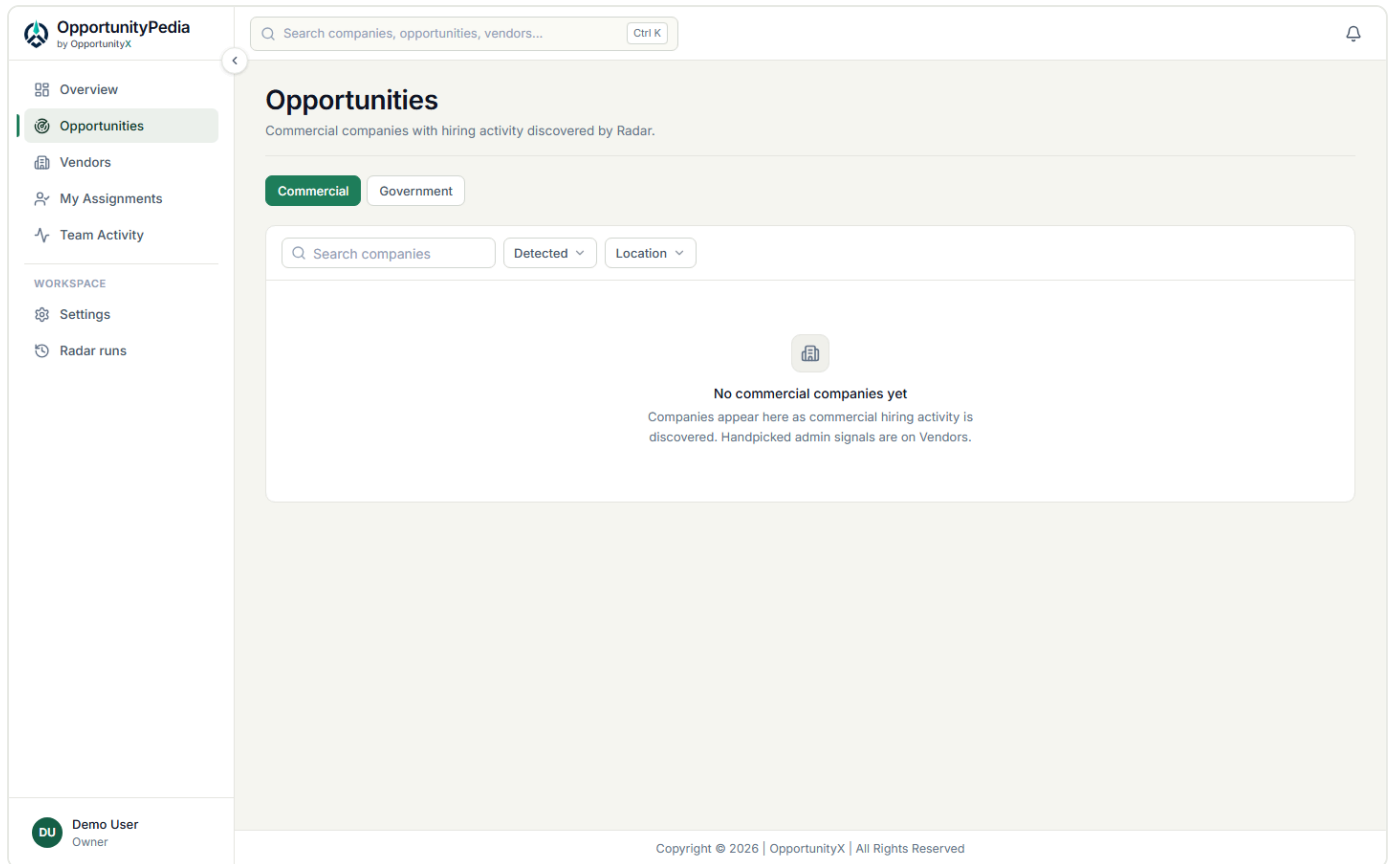

If **Run** is unavailable, wait for the cooldown or check **Radar runs**.

3. Browse Opportunities

Open **Opportunities** in the sidebar.

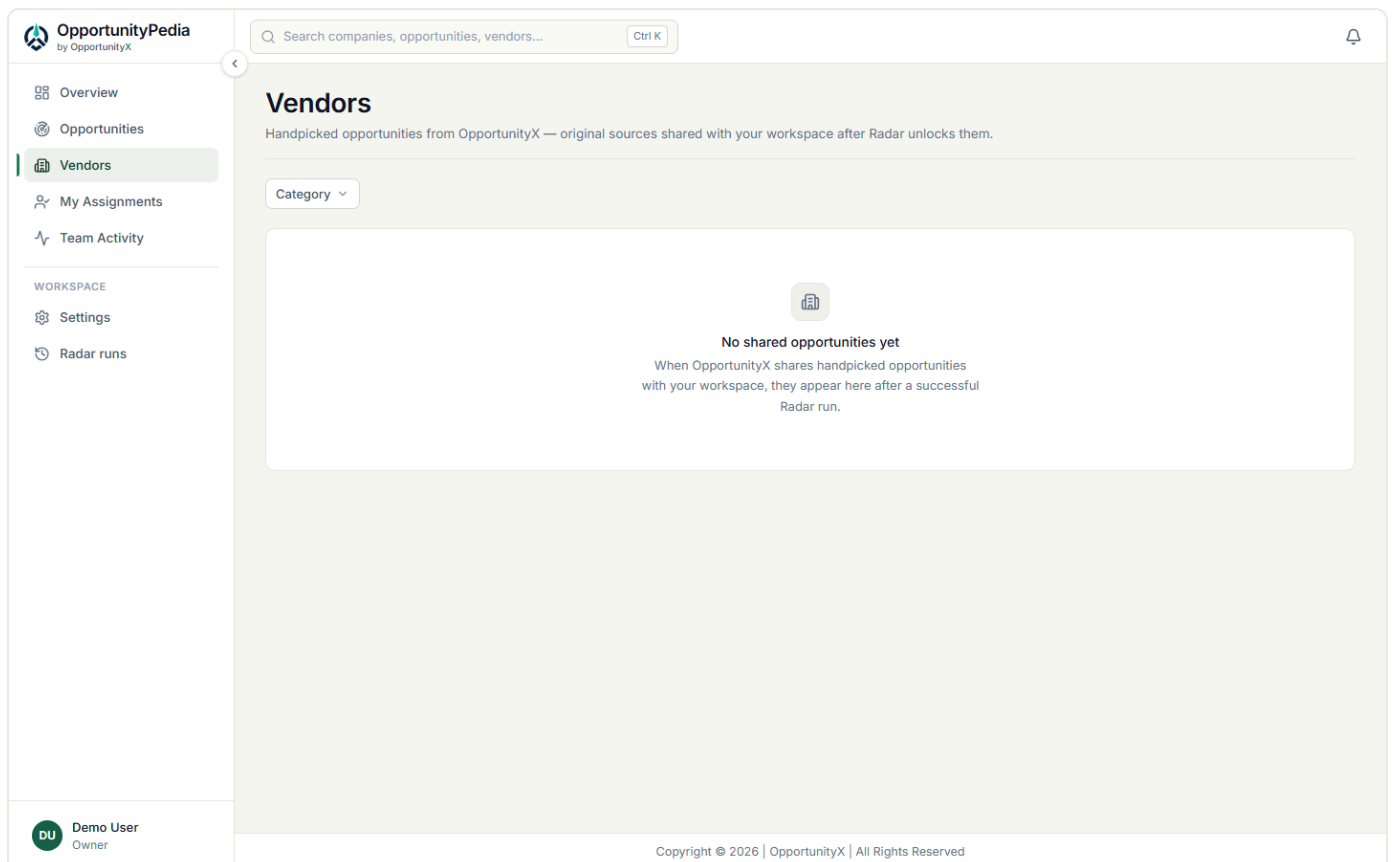

- **Commercial** — company hiring activity
- **Government** — public-sector / contract-style signals

Click a row for details, assign, or send outreach.

4. Check Vendors

Open **Vendors** for handpicked opportunities shared with your workspace. They appear after a **successful Radar run**.

5. Work as a team

- **My Assignments** — your queue
- **Team Activity** — what the team did
- Outreach — send email (AI draft available when enabled)

6. Company email (owners)

Settings → **Email** — add your company SMTP so outreach sends from your mailbox.

Email / SMTP

Send outreach from your company mailbox. Invites and password emails still use OpportunityPedia.

Not configured — outreach uses platform mail

SMTP host *

smtp.yourcompany.com

e.g. smtp.gmail.com or smtp.office365.com

Port *

587

587 (STARTTLS) or 465 (SSL)

Username *

Password *

App password or SMTP password.

From email *

Must be allowed by your SMTP provider.

From name

Shown as the sender name (usually your company).

Encryption

STARTTLS (port 587)

Use for outreach

Enabled

Save SMTP

Send test email

Invites and password emails still use the platform mail.

Quick map

Page	Purpose
Overview	Dashboard + Run
Opportunities	What Radar found
Vendors	Shared / handpicked leads
My Assignments	Your work
Team Activity	Team follow-ups
Settings	Profile, team, email, plan
Radar runs	Scan history

Simple meanings

- **Hot / Very Hot** — priority signals (act on Very Hot first)
 - **Commercial** — private-sector hiring
 - **Government** — public / contract-style
 - **Radar** — the scan that refreshes your data
 - **Vendors** — curated leads for your workspace (not a vendor marketplace)
-

Daily rhythm

1. Overview → **Run** (when available)
 2. Check Opportunities
 3. Check Vendors
 4. Work My Assignments
 5. Glance at Team Activity
-

Need help?

Profile menu (bottom of the sidebar) → **Help & Support**, or use the website **Contact** page.

OpportunityPedia by OpportunityX — find the signal, act together.
