

OpportunityPedia — Quick Start Guide

Welcome. This short guide explains **what OpportunityPedia is**, **why it helps you**, and **how to use it** after you sign in.

What is OpportunityPedia?

OpportunityPedia is an opportunity intelligence platform for staffing and business development teams.

It brings hiring signals and US government contract opportunities into **one place**, so your team can spot hot leads faster and act on them together.

The problem we solve

Finding good opportunities today usually means:

- Checking many job boards one by one
- Searching government sites manually
- Sharing leads in chats or spreadsheets
- Losing track of who followed up

That is slow, easy to miss, and hard for a team to manage.

What you achieve with us

With OpportunityPedia you can:

- 1. **Scan** many sources in one click (Radar)
- 2. **See** commercial hiring and government opportunities clearly
- 3. **Focus** on the hottest signals first
- 4. **Assign** leads and track outreach as a team
- 5. **Unlock** handpicked vendor / shared opportunities after a successful scan

Less hunting. More closing.

Simple map of the product

What you see	What it means
Radar	The scanner. It looks across job boards and government sources, then refreshes your data.
Overview	Your home dashboard — totals, hot signals, and the place to click Run .
Opportunities	What Radar found: commercial hiring + government tenders.
Vendors	Special handpicked opportunities shared with your workspace (unlocked after a successful Radar run).
My Assignments	Items assigned to you.
Team Activity	What your team has been doing.
Settings	Profile, plan, and workspace preferences.
Radar runs	History of past scans.

Your first session (step by step)

Step 1 — Sign in

Go to the login page and sign in with your account.

You land on **Overview**.

Step 2 — Run Radar

On **Overview**, click **Run**.

Radar starts scanning. Wait until it finishes (you'll see status updates).

Tip: Radar may need a short wait between runs. If **Run** is unavailable, check the message or open **Radar runs**.

Step 3 — Check Overview

After a successful run, Overview shows your latest picture:

- How many opportunities you have
- What looks **Very Hot** or **Hot**
- Filters like **All** / **Government** / **Commercial**

Use this page to decide where to dig first.

Step 4 — Explore Opportunities

Open **Opportunities** in the left sidebar.

Here you browse what Radar discovered:

- **Commercial** — companies that look active in hiring

- **Government** — tenders and procurement-style signals

Click any row to open details. From there you can review, assign, or start outreach.

Step 5 — Check Vendors

Open **Vendors**.

These are curated opportunities shared with your workspace. They appear after a **successful Radar run**.

Filter by **All** / **Commercial** / **Government** if you want a narrower view.

Step 6 — Work as a team

- Open an opportunity → assign it if needed
- Use **My Assignments** for your personal queue
- Use **Team Activity** to see team follow-ups
- Use outreach (including AI draft, when available) to send a professional message

Step 7 — Stay on top of updates

- Check notifications for new findings
- Use search at the top when you know a company or keyword
- Re-run Radar when you want a fresh scan (respect any cooldown)

Quick meanings (no jargon)

Hot / Very Hot — How strong or urgent the signal looks. Very Hot usually deserves attention first.

Commercial — Private-sector / company hiring style opportunities.

Government — Public-sector / contract-style opportunities.

Radar run — One full scan from start to finish.

Vendors (in this app) — Shared, handpicked opportunities for your workspace — not a separate marketplace to manage vendors yourself.

Suggested daily rhythm

1. Open **Overview**
2. Click **Run** (when available)
3. Scan **Opportunities** for new or hot items
4. Check **Vendors** for shared leads
5. Work your **My Assignments**
6. Glance at **Team Activity** so nothing slips

That's it.

Need help?

Open your **profile menu** (bottom of the sidebar) → **Help & Support**.

Or contact the OpportunityPedia team through the public website **Contact** page.

OpportunityPedia by OpportunityX — find the signal, act together.
